

JOB OPENING

Project Engineer- Job ID#L908

Company: Teledyne Energy Systems, Inc.
Location: Sparks, Maryland
Status Type: Full Time
Clearance: Yes
Work Week: Monday – Friday

Education & Experience:

B.S. in Chemical or Materials Engineering required, 5 years of relevant experience preferred. A blend of analytical problem solving skills with hands on experience in a development and/or manufacturing environment is desired, preferably in batteries or electromechanical products. Skills and experience with materials compatibility, packaging, tooling design, welding, process engineering, and testing is desired. Experience with Solid Edge and/or Autodesk Inventor also preferred. CAD experience is a plus. Must have good verbal, written, and computer skills.

Work Description:

Serve as project engineer on multiple development projects. Take electrochemical cell concepts through design/qualification process, to a packaged deliverable product. Work as part of a team to develop process improvements, investigate problems, and implement corrective actions. Write reports and prepare presentations for monthly customer meetings. Interface with vendors on purchase specification.

U.S. Citizenship with ability to attain clearance upon hire required.

For consideration send resume and salary history, noting position desired, to:
